

Bismides workshops

The first workshop was founded by the participants of the Materials World Network: III-V Bismide Materials for IR and Mid IR Semiconductors, in 2010. During the three years of the Materials World Network program these folks served as the steering committee, program committee, and hosts of the workshop venue. The founders continue to serve on the steering committee to guide the Workshop into the future. Starting from 2013 the Workshop venue was broadened to include hosts in the global bismuth materials community.

The Founders

Shane Johnson, Arizona State University, Tempe, US

Stephan Koch, Philipps-Universität, Marburg, Germany

Joanna Mirecki Millunchick, University of Michigan, Ann Arbor, US

Patricia Mooney, Simon Fraser University, Burnaby, Canada

Stephen Sweeney, University of Surrey, Guildford, UK

Tom Tiedje, University of Victoria, Victoria, Canada
